

## REP. FRED DURHAL, JR.

---

March 1, 2007

To Whom It May Concern:

This letter comes in strong endorsement of the RAC gunlock system. I believe that this device, if utilized, will significantly reduce the incidents of accidental deaths caused when people, especially children, find loaded weapons and start "examining" them or even worse, playing with them. The newspapers have been replete with such incidents. These tragedies are preventable and the RAC system ensures that. This gunlock system has been endorsed by law enforcement agencies throughout Michigan and the United States.

I also want to commend the efforts of Mr. William McMurray and his fine staff, who is making sure that this life-saving invention is being brought to the attention of the general public.

I urge investors to invest in this system so that every gun and firearm manufactured will have this product included as standard equipment. I urge companies and non-profit organizations to purchase and sponsor the RAC gunlock system as gifts for police agencies to hand out to every person who has a gun.

I usually do not endorse individual products in the marketplace to others but this is an exception. It is not about profiteering, it is about saving the lives of our people, our future leaders and our state and nation.

I strongly endorse the RAC Gunlock System and hope you will too.

Peace and Power,

*Fred Durhal, Jr.*

**Rep. Fred Durhal, Jr.**  
Michigan House of Representatives (Emeritus)
